

Job Title: Frontend Developer - React/Next.js

Location: Remote

Role Overview:

We are seeking a talented and motivated Frontend Developer to join a dynamic engineering team. You will play a key role in designing, developing, and maintaining user interfaces for web applications using modern frontend technologies. You'll work closely with designers, product managers, and backend engineers to translate requirements and designs into high-quality, performant, and scalable frontend code. A strong understanding of React, Next.js, and specifically experience implementing state management with **Zustand** is crucial for this role.

Key Responsibilities:

- Develop, test, and deploy responsive and engaging user-facing features using React.js and Next.js.
- Build reusable components and maintainable frontend libraries for future use.
- Implement complex state management logic efficiently using **Zustand**.
- Translate UI/UX designs and wireframes into pixel-perfect, functional code.
- Optimize application performance for speed, scalability, and responsiveness across various devices and browsers.
- Integrate with backend APIs (RESTful or GraphQL) to fetch and display data.
- Write clean, well-documented, and testable code following best practices.
- Collaborate effectively within a cross-functional team (Design, Product, Backend) in an Agile environment.
- Participate actively in code reviews, providing and receiving constructive feedback.
- Stay current with emerging frontend technologies and propose improvements to the tech stack and processes.
- Troubleshoot and debug frontend issues.

Required Skills & Qualifications:

- Proven experience (typically 2-5+ years) as a Frontend Developer or similar role.
- Strong proficiency in JavaScript (ES6+) and/or TypeScript (TypeScript preferred).
- Deep understanding of React.js, its core principles (Hooks, Context), and ecosystem.
- Solid hands-on experience with Next.js (SSR, SSG, ISR, API Routes, Routing, Image Optimization).
- **Demonstrable experience and strong understanding of state management using Zustand.** You should be able to explain its core concepts and why you might choose it.
- Experience with modern CSS methodologies and libraries (e.g., Tailwind CSS, CSS Modules, Styled Components, Emotion).
- Proficiency with HTML5 and CSS3.
- Experience consuming RESTful APIs; familiarity with GraphQL is a plus.
- Familiarity with modern frontend build tools (Webpack, Babel, npm/yarn).
- Proficiency with Git version control (GitHub, GitLab, etc.).
- Understanding of responsive web design principles and cross-browser compatibility.

- Excellent problem-solving and debugging skills.
- Strong communication and collaboration skills.

Bonus Points (Nice-to-Haves):

- Experience writing unit and integration tests using frameworks like Jest and React Testing Library.
- Experience with end-to-end testing tools (e.g., Cypress, Playwright).
- Familiarity with CI/CD pipelines (e.g., GitHub Actions, Jenkins, Vercel CI/CD).
- Knowledge of web performance optimization techniques.
- Experience with accessibility (a11y) best practices.
- Contributions to open-source projects or a public portfolio (GitHub).

What We Offer:

- Competitive compensation package.
- Opportunity to work on challenging projects with modern technologies.
- A collaborative and supportive work environment.
- Opportunities for professional growth and learning.
